📍 Delhi NCR, India

PROFESSIONAL SUMMARY

Senior Frontend Engineer with **9+ years of experience** architecting enterprise web applications for **Google, S&P Global, British Telecom**, serving **30M+ users worldwide**. Expertise in **Angular, RxJs, JavaScript, TypeScript, system design, NgRx, performance optimization and technical leadership** with a track record of improving application performance by **40%**, achieving **99% test coverage**, mentoring teams, and delivering scalable Angular solutions for FinTech and large-scale enterprise products using **AI-assisted engineering practices**.

PROFESSIONAL EXPERIENCE

MBS Global (Client: S&P Global, Gurgaon) Software Architect · Sep 2025 – Present

CLO Compliance Platform · FinTech · B2B · Angular · LLM / AI Agents – Javascript/Typescript

- Lead end-to-end delivery of a **critical B2B compliance platform**, collaborating with Product Owners, Business Analysts, QA, and Backend Engineers to design scalable solutions for financial institutions.
- Architected and delivered a Stress Testing framework enabling Python DSL-based rule simulation against historical datasets, **improving regulatory validation by 30%** and trade compliance analysis.
- Improved **application performance by 20%**, security, and maintainability by implementing session management, intelligent auto logout, reusable component architecture, and optimized Angular rendering.
- Introduced **AI-assisted engineering workflows** using LLMs, **accelerating** feature development and improving developer productivity across the team.
- Increased unit test coverage **from 70% to 99%**, enabling high-quality releases with **zero regression defects** through robust testing and code review practices. Partner with engineering leadership to define technical solutions, estimate project scope, identify delivery risks, and ensure on-time release of high-quality software.
- Implemented clean architecture, reusable component design, coding standards, and knowledge sharing to improve long-term maintainability and engineering velocity.

HCLTech, Bangalore (Client: Google) | Technical Lead · Apr 2023 – Aug 2025

Google Nest Developer Console (NDC) · 10M+ Users · Angular 18 · Micro Frontend

- Led frontend development for the **Google Nest Developer Console**, delivering scalable Angular applications supporting **10M+ users**.
- Modernized the platform using Angular Material, WCAG compliant components, Micro Frontend architecture, and reusable design systems, improving page performance and rendering speed by **25%**.
- Delivered OTA device management and Cloud-to-Cloud integration workflows while optimizing application performance through lazy loading, code splitting, and efficient change detection.
- Resolved **200+ P0/P1 production issues**, strengthened CI/CD pipelines, and achieved **99%+ test coverage** with **zero-regression releases**.
- Mentored engineers, authored technical design documentation, and drove engineering best practices through architecture reviews and code reviews.

GlobalLogic, Bangalore (Client: Google) | Associate Consultant · Nov 2021 – Mar 2023

Google Qplus platform & Chrome Extension · Angular 8+ · Typescript

- Developed enterprise web applications and Chrome Extensions for Google's QPlus platform using Angular, TypeScript, and REST APIs, improving **application responsiveness by 40%**.
- Designed reusable metadata-driven dynamic forms and shared component libraries, improving scalability, maintainability, and feature delivery.
- Reduced API failures and production defects through optimized data transformation, resilient API integration, and proactive root cause analysis.

Mindtree, Bangalore (Client: Wolters Kluwer) | Module Lead · Dec 2020 – Nov 2021

Employee Daily Time Collection (EDTC) · Wolters Kluwer · 20K+ Users - Angular – Azure AD

- Led a **6-member Agile team** to deliver a workforce management platform serving **20K+ enterprise users**, driving architecture, technical delivery, and cross-functional collaboration.

- Improved frontend performance by **25%** and API response time by **20%** through Angular optimization, NgRx state management, caching, and HTTP interceptors.
- Implemented **Azure AD OAuth2 Single Sign-On**, strengthened application security, and delivered accessible, internationalized enterprise applications following **WCAG standards**.

Infosys, Pune(Client: British Telecom) | Senior Software Engineer · Jan 2017 – Dec 2020
System Assurance UI · Speed Test · Broadband Checker · 20M+ Users

- Developed enterprise-scale customer applications for **British Telecom**, delivering responsive, **WCAG-compliant** solutions supporting **20M+ users**.
- Built high-performance applications including **System Assurance UI**, **BT Speed Test**, and **Broadband Availability Checker** using Angular, TypeScript, and MVVM architecture.
- Improved software quality through reusable component development, performance optimization, production support, and cross-functional Agile collaboration.

TECHNICAL SKILLS

Frontend	Angular (v2–v21), TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS/SASS, RxJS, NgRx, Angular Material, Bootstrap, jQuery.
Architecture	Micro Frontends, Component-Based Architecture, MVVM, State Management, Responsive Web Design, Design Systems, REST APIs, GraphQL.
Performance Engineering	Lazy Loading, Change Detection Optimization, Code Splitting, Bundle Optimization, Caching, Rendering Optimization, Performance Tuning.
AI / LLM	AI-Assisted Development, LLM Integration, Prompt Engineering, AI Agents, GitHub Copilot, Claude Code.
Testing	Jasmine, Karma, Unit Testing, Integration Testing, Test-Driven Development (TDD), Code Reviews, Static Code Analysis, Scuba.
Cloud & Security	Azure AD, OAuth 2.0, Single Sign-On (SSO), Authentication, Authorization, REST Security.
Data & Visualization	Ag-Grid, Highcharts, Angular Material, JSON, SQL.
DevOps / Tools	Git, Jenkins CI/CD, Jira, Chrome DevTools, Visual Studio Code, Linux CLI.

AWARDS & RECOGNITION

- AHM Award** — HCLTech, for outstanding contribution to the Google Nest Developer Console platform.
- Spot-on Mastermind Award** — for delivering quality products with Angular Jumpstart components under a tight deadline.
- Spot-on Hats-Off Award** — for delivering high-quality, complex frontend modules on time to the client.
- Problem Solver Gracias Award** — recognising hard work, commitment, and leadership skills.
- Spot-on A-Team Award** — for Angular JS → Angular 11 scope rewrite with full WCAG accessibility compliance.
- Infy Award** — for designing and developing a responsive UI from scratch (British Telecom).

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science
M. S. Ramaiah Institute of Technology (MSRIT), Bangalore · 2012 – 2016

LANGUAGES

English (Professional) · Hindi (Native)
