

ABHISHEK SHARMA

Senior Software Engineer | Technical Lead | Frontend Architecture & AI-Assisted Engineering

9+ Years · Angular & React · FinTech · Java (API Integration & Microservices Training) · AI-Assisted Engineering Leadership

Delhi NCR, India | +91 9611203570 | abhisheks647@gmail.com | [LinkedIn](#) | Portfolio | [LeetCode](#)

PROFESSIONAL SUMMARY

Senior Software Engineer with **9+ years** architecting enterprise Angular and React applications across FinTech and large-scale platforms, including client engagements with **Google, S&P Global, and British Telecom** serving **30M+ users** combined. Regularly integrates with **Java-based backend services** — handling API integration and production root-cause analysis — and completed formal **Java and Microservices training** during onboarding at Infosys, alongside hands-on **SQL and NoSQL** project experience. Leads frontend architecture, testing strategy, and **AI-assisted engineering adoption**: introduced LLM-based development workflows at S&P Global together with **responsible-AI and data-sensitivity validation standards**, and raised a compliance platform's unit test coverage from 70% to 99%.

NOTABLE ACHIEVEMENTS

- Introduced **AI-assisted engineering workflows** (LLM-based) into a production FinTech team, establishing **responsible-AI and data-sensitivity validation standards** alongside adoption.
- Raised unit test coverage from **70% to 99%** at S&P Global, enabling **zero-regression releases** on a compliance-critical platform.
- Improved application performance by up to **40%** through Angular/React optimization, state management, and rendering improvements across multiple platforms.
- Led cross-functional teams of up to **6 engineers**, delivering compliance and workforce platforms used by **30M+ users** combined.

PROFESSIONAL EXPERIENCE

MBS Global (Client: S&P Global, Gurgaon) | Software Architect

Sep 2025 – Present

CLO Compliance Platform · FinTech · B2B · Angular · LLM / AI Agents · TypeScript

- Led end-to-end delivery of a B2B regulatory compliance platform, partnering with Product, QA, and Backend engineering to define API contracts and scalable financial workflows.
- Architected a Stress Testing framework enabling Python DSL-based rule simulation, improving regulatory validation by **30%**.
- Improved application performance by **20%** through session management, intelligent auto-logout, and Angular rendering optimization.
- Introduced **AI-assisted engineering workflows** using LLMs into the team's delivery process, establishing **data-sensitivity and responsible-AI usage guidelines** and validation standards alongside adoption to accelerate feature development.
- Raised unit test coverage from **70% to 99%**, enabling releases with zero regression defects.
- Established component design standards and code-review practices adopted across the team.

HCLTech, Bangalore (Client: Google) | Technical Lead

Apr 2023 – Aug 2025

Google Nest Developer Console (NDC) · 10M+ Users · Angular 18 · Micro Frontend

- Led frontend development for the Google Nest Developer Console, delivering Angular applications for **10M+ users** on a micro-frontend architecture.
- Contributed to **high-level system design** for major NDC features, partnering with backend engineering on API design and with Product on requirements.
- Modernized the platform with Angular Material and WCAG-compliant components, improving rendering speed by **25%**.

- Delivered OTA device management and Cloud-to-Cloud integration workflows, optimized via lazy loading and code splitting.
- Resolved **200+ P0/P1 production issues** through direct collaboration with backend teams on root-cause analysis.
- Mentored engineers and drove architecture and code-review standards across the team.

GlobalLogic, Bangalore (Client: Google) | Associate Consultant

Nov 2021 – Mar 2023

Google QPlus Platform & Chrome Extension · Angular 8+ · TypeScript

- Developed enterprise web applications and Chrome Extensions for Google's QPlus platform, improving responsiveness by **40%**.
- Designed reusable metadata-driven dynamic forms and shared component libraries, translating **Figma** designs into production UI.
- Reduced API failures and production defects through close collaboration with backend engineers on resilient API integration and root-cause analysis.

Mindtree, Bangalore (Client: Wolters Kluwer) | Module Lead

Dec 2020 – Nov 2021

Employee Daily Time Collection (EDTC) · 20K+ Users · React · Redux · Azure AD

- Led a **6-member Agile team** to deliver a workforce management platform built in React, serving **20K+ enterprise users**.
- Improved frontend performance by **25%** and API response time by **20%** using Redux, caching, and HTTP interceptor patterns.
- Implemented Azure AD OAuth2 Single Sign-On and delivered accessible, internationalized applications per WCAG standards.

Infosys, Pune (Client: British Telecom) | Senior Software Engineer

Jan 2017 – Dec 2020

System Assurance UI · Speed Test · Broadband Checker · 20M+ Users

- Developed enterprise-scale customer applications for British Telecom, supporting **20M+ users** with responsive, WCAG-compliant UIs.
- Built System Assurance UI, BT Speed Test, and Broadband Availability Checker using Angular, TypeScript, and MVVM architecture, integrating with **Java-based backend APIs**.
- Performed **root-cause analysis on production issues** in collaboration with backend teams, and completed **6 months of formal Java and Microservices training** as part of Infosys onboarding.
- Worked with **SQL and NoSQL** data stores to support application data requirements.
- Improved software quality through reusable components, performance optimization, and cross-functional Agile collaboration.

TECHNICAL SKILLS

Frontend	Angular (v2–v21), React, Redux, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS/SASS, RxJS, NgRx, Angular Material, Bootstrap, jQuery
Backend & Data Exposure	Java (API integration & production debugging), Microservices (formal training, Infosys), SQL, NoSQL, REST APIs, Node.js
Architecture	Micro Frontends, Component-Based Architecture, MVVM, State Management, Responsive Web Design, Design Systems
AI / LLM Engineering	AI-Assisted Development, LLM Integration, Prompt Engineering, AI Agents, Responsible AI / Data-Sensitivity Validation, GitHub Copilot, Claude Code
Performance Engineering	Lazy Loading, Change Detection Optimization, Code Splitting, Bundle Optimization, Caching, Rendering Optimization
Design & Collaboration	Figma (UI design collaboration), Cross-functional API design with backend engineering
Testing	Jasmine, Karma, Unit Testing, Integration Testing, Test-Driven Development (TDD), Code Reviews, Static Code Analysis

Security	Azure AD, OAuth 2.0, Single Sign-On (SSO), Authentication, Authorization, REST Security
DevOps / Tools	Git/GitHub (6+ yrs), Jenkins CI/CD (6+ yrs), Jira, Chrome DevTools, VS Code, Linux CLI
Problem Solving	Data Structures & Algorithms (active LeetCode practice)

AWARDS & RECOGNITION

- **AHM Award** — HCLTech, for outstanding contribution to the Google Nest Developer Console platform.
- **Spot-on Mastermind Award** — for delivering quality products with Angular Jumpstart components under a tight deadline.
- **Spot-on Hats-Off Award** — for delivering high-quality, complex frontend modules on time to the client.
- **Problem Solver Gracias Award** — recognising hard work, commitment, and leadership skills.
- **Spot-on A-Team Award** — for AngularJS → Angular 11 scope rewrite with full WCAG accessibility compliance.
- **Infy Award** — for designing and developing a responsive UI from scratch (British Telecom).

EDUCATION

Bachelor of Engineering (B.E.) in Medical Electronics — 2012 – 2016

M. S. Ramaiah Institute of Technology (MSRIT), Bangalore

LANGUAGES

English (Professional) · Hindi (Native)
